Education

Cornell University, Bowers College of Computing and Information Sciences

Aug 2024 – Dec 2027 (Expected)

Bachelor of Arts in Information Science, Concentration in Networks, Crowds, and Markets (Data & Economics)

GPA: 3.5/4.0 | SAT: 1500 | ACT: 34

Relevant Coursework: Business Intelligence Systems, Object-Oriented Programming & Data Structures, Data Science in Python, Web Design & Programming, Engineering Probability and Statistics, Information Ethics/Law/Policy, Microeconomics & Macroeconomics

Experience

IBM — Technical Sales Solutions Intern (Brookhaven, GA)

May 2026 – Aug 2026

- Prospected infrastructure and whitespace accounts across four U.S. regions for IBM hybrid cloud solutions (FlashSystem, PowerVS, Fusion), engaging potential clients and securing meetings with technical specialists
- Interviewed sellers to identify outreach bottlenecks and requirements; tested email/call strategies across industry, IT spend, and revenue segments to inform workflow improvements
- Built and proposed internal tools automating personalized seller outreach; presented POCs, technical documentation, and an implementation plan to IBM's Georgia Senior State Executive/VP and her leadership team
- Led advanced IBM Bob demonstrations at the in-person watsonx event, showcasing AI-assisted development workflows
- Ranked top five among interns: 11.1% call-connection rate, 75.7 average activities per success, and 2.4% positive-call rate; selected as a campus ambassador and invited as a guest speaker for the IBM US College & University Tech Talk

Cornell Hack4Impact Project Team (Ithaca, NY)

Feb 2025 – Present

Product Manager / Technical Lead – Mavuno

May 2026 – Present

- Lead a team of four developers and two designers building an AI-powered mobile and web platform connecting farmers in the Democratic Republic of Congo with Mavuno for continued agricultural support
- Translate constraints in literacy, bandwidth, French/Swahili communication, and cost into product and technical requirements; own the PRD, SDD, and two-semester roadmap
- Drive sprint planning and prioritization, review technical/design work, mentor an Associate PM, and lead biweekly client meetings to align development with stakeholder needs
- Guide architecture across React Native/Expo, React/TypeScript, Node.js/Express, Supabase, and AI-powered text/voice workflows

Full-Stack Developer

Feb 2025 – May 2026

- Developed features across two nonprofit products: an [endowment manager](#) for small organizations, and an [inventory system](#) for the Hudson Valley Textile Project; implemented weekly engineering tickets across Agile sprints
- Sourced prospective nonprofit partners, identified technical needs through exploratory calls, and engaged organizations to adopt and customize existing Hack4Impact products

Cornell University — Teaching Assistant, INFO 2850: Networks (Ithaca, NY)

Aug 2026 – Present

- Lead weekly office hours for a 300+ student course covering network analysis, game theory, markets, and strategic interaction; grade coursework and support students through the course forum

Timing LLC — Business Analyst Intern (Remote)

Dec 2025 – Feb 2026

- Built WAU models and user surveys to assess engagement; developed ICPs and a campus acquisition strategy; wrote newsletters

Cornell Phonetics Lab — Research Assistant (Ithaca, NY)

Aug 2024 – Dec 2025

- Analyzed speech-transcript data (Python, NumPy, SciPy, Matplotlib); built a TextGrid workflow and mentored seven research assistants

Projects

BobBee — Automated Intelligent Sales Outreach | [GitHub](#) | [Demo](#)

July 2026

- Developed an AI-assisted sales platform that ranks accounts into cadences, generates outreach schedules and email/call queues, and uses watsonx.ai/Granite for personalized messaging

IBM Hive — Seller Organization and Relationship Manager | [GitHub](#) | [Demo](#)

July 2026

- Built and deployed a full-stack seller platform for org mapping, relationship management, territory coverage, and pipeline using Node.js, Express, SQLite, and REST APIs

County-Level Health & Community Factors Analysis | [GitHub](#)

Fall 2025

- Modeled relationships between environmental, socioeconomic, and behavioral factors and mental and physical health outcomes across U.S. counties, identifying environmental accessibility as a potential policy lever

Leadership and Event Management Experience

Girls Who Code: Advanced Coding Class — Volunteer Instructor (Ithaca, NY)

Feb 2025 – May 2025

- Taught middle and high school students HTML, CSS, and game development in weekly 1.5-hour classes

Infinite Finesse Tournaments — Founder & Event Organizer (Remote) | [Twitch](#)

Sep 2020 – Mar 2024

- Founded and led a 7,000+ member tournament community with 600+ Twitch followers; raised \$2,600 for a children's hospital

Technical Skills

Languages: Python, Java, JavaScript/TypeScript, R, SQL, HTML/CSS

Frameworks: React, React Native/Expo, Next.js, Node.js/Express, Flask

Data & Databases: PostgreSQL/Supabase, SQLite, Pandas, NumPy, SciPy, scikit-learn, Matplotlib, Plotly

Tools & Platforms: Git, Docker, Cloudflare, Firebase, Figma, IBM watsonx.ai
